Optional – for advanced users

1. **Active (On/Off):** If you have multiple pages activated, the traffic will automatically split to the different pages, allowing you to split test different pages
2. **Opt in %:** The percentage of subscribers you are receiving from the traffic. If the opt in % is low, you can turn the page off, to send the traffic to another page with a better opt in %.
3. **Pixels:** You can add in your Facebook or Google Pixel here if you are running paid traffic to the pages

4. Copy Link: To copy the link of the specific page. DO NOT use this if you are unsure what you are doing.

5. Reset %:

Reset %

Resets Opt in % for all profit pages. To be used before a new traffic source sends traffic to find out the best converting profit page.
